Hawaiian™ Kettle Style Potato Chips Review

Escape To The Islands With The Unique Taste of Hawaiian™ Kettle Style Potato Chips

Now Available in Salt Lake City and Greater Utah Area

We received a few samples of Hawaiian™ Kettle Style Potato Chips to review. My kids and I really enjoyed them. They have a kettle style look with a great thickness to create the perfect crispy crunch that lets you know you are enjoying a delicious potato chip!

The flavor of the original is great and not too salty, in fact it was almost under salty if you are one that likes that strong salt flavor on your chips. My kids loved the "Sweet Maui Onion" with its strong and very noticeable & delicious ingredients covering each chip, they

ate the whole bag in minutes and wished they had sent us the large bag of that flavor instead! Compared to the original flavor its got a lot of kick and would I personally prefer it. The Hawaiian Luau BBQ was also a favorite, and one I think we like almost better than a regular barbecue flavored chip, it has the the prefect amount of sweet and spices and a smoky like flavor thats so good!

Wasabi was yummy as well, has the wasabi kick or sure, but not too much that the kids didn't mind eating it as well. I like wasabi flavor, these were good but not a favorite.

Available in Harmons, Wal-Mart and Smith's

A little more info from an e-mail they sent me that tells all about their delicious chips & their company!
